EDUCATION

Bachelor's Degree in Information Systems.

Higher Institute for Computers and Information – Tanta (2022 – 2026)

TECHNICAL SKILLS

- **Mobile Development:** Flutter, Dart.
- **State Management:** BLoC, Cubit.
- **Architecture & Design Patterns:** Clean Architecture, MVVM, MVC, SOLID.
- **Backend & APIs:** Firebase (Auth, Firestore, Realtime DB, Storage), Supabase, RESTful APIs.
- **Database Management:** SQLite, SharedPreferences.
- **Networking:** Dio, HTTP.
- **Tools & DevOps:** Git, GitHub, GitHub Actions (CI/CD), Postman, Android Studio, VS Code.
- **Other Skills:** OOP, Location Services, Custom Animations, Offline-First Architecture, App Flavor Configuration, Google Play Deployment.

PROJECTS

Power Pulse — Fitness & Nutrition Tracker [\[GitHub\]](#) [\[Google Play\]](#)

- **Description:** A complete fitness app for tracking workouts, calories, BMI, and nutrition. Users can log daily meals and exercises using real-time data from external APIs.
- **Key Features:** Workout tracking, calorie logging, BMI calculator, real-time food and exercise data, user accounts with cloud sync.
- **Technologies:** Flutter, Dart, BLoC, MVVM, Firebase Auth, Firestore, REST API, Dio.

Quran Karim — قرآننا [\[GitHub\]](#) [\[Google Play\]](#)

- **Description:** An offline-first Islamic app featuring the complete Quran, daily Azkar, and reading progress tracking. Works fully without an internet connection.
- **Key Features:** Full Quran with last-read tracking, daily Azkar, GPS-based prayer times, dark and light themes.
- **Technologies:** Flutter, Dart, Cubit, MVVM, SQLite, Location Services.

Hotel Guide — AQUA (Graduation Project) [\[GitHub\]](#)

- **Description:** A hotel booking app where users can browse rooms, make reservations, and pay securely. Built as a graduation project applying professional architecture standards.
- **Key Features:** Room browsing, reservation management, Stripe payment integration, real-time data with Supabase.
- **Technologies:** Flutter, Dart, Clean Architecture, BLoC/Cubit, Supabase, Stripe.

Dalily — City Services Locator [\[GitHub\]](#)

- **Description:** A location-based directory that helps users find nearby services like clinics, pharmacies, restaurants, and repair centres.
- **Key Features:** Location-based search, service listings, admin panel to review and approve new providers, media uploads.
- **Technologies:** Flutter, Dart, Cubit, MVVM, Firebase Auth, Supabase Storage, Location Services, Animations.
